Abstract

After almost vanishing, Shibasso has risen like a phoenix, growing beyond just a painter to expand into a new purpose. Shibasso is a revolutionary artist, a painter, and a coordinator in the chaotic world of memes. He loves to paint and aims to bring back order to the chaos of the meme world, ensuring the integrity and vibrancy of the meme ecosystem.

Introduction

Background

- The traditional way of creating paintings has its charm, and each piece is truly unique. How can we make real-world art tradable as NFTs?
- The meme world is rife with scams and disorder, calling for a revolutionary solution.

Problem Statement

- Delivering real-world art as NFTs.
- The lack of security and trust in meme transactions and the prevalence of rug pulls.

Vision and Mission

- To create an ecosystem where real-world artists can transform their paintings into NFTs, allowing buyers to own the artwork both physically and digitally.
- To create a secure and safe meme world.

Project Description

What Shibasso Will Do

Shibasso is not just a meme coin; it's a revolutionary project that combines art and security. Shibasso will:

- **Create a Unique Marketplace:** Establish a platform where artists can tokenize their real-world paintings as NFTs, ensuring authenticity and value.
- **Enhance Transaction Security:** Implement ShibassoPay, an escrow service that secures transactions between buyers and sellers, releasing funds only when the agreed-upon terms are met.
- **Prevent Fraud:** Utilize ShibassoSwap with a time-locker contract to prevent rug pulls, holding significant withdrawals for a set time to ensure security.
- **Foster Community Ownership:** Transition to a DAO, giving power to the community and ensuring that Shibasso is community-owned and governed.
- **Promote Transparency and Fairness:** Provide a dispute resolution process through ShibassoPay, involving arbitration to ensure fair outcomes.

Unique Selling Proposition (USP)

A robust ecosystem with ShibassoPay, ensuring secure transactions and community governance.

ShibassoPay: Secure Escrow Service

There are many scammers outside. To enhance trust and security with payments within the ecosystem, we introduce ShibassoPay, an innovative escrow service. ShibassoPay ensures that funds are held securely by Shibasso, depending on the contract between the payer and payee. The payee gets paid only after the work is done.

How ShibassoPay Works:

1. **Initiate Transaction:** The buyer and seller agree to use ShibassoPay for their transaction. The buyer deposits the agreed amount into the ShibassoPay escrow account.
2. **Secure Holding:** The funds are securely held in the escrow account, protected by a time-locker contract. This contract ensures that the funds cannot be withdrawn prematurely, protecting both parties from fraud.
3. **Completion of Terms:** The seller completes the terms of the agreement, delivering the product or service as specified.
4. **Verification and Release:** The buyer verifies the completion of the terms. Once verified, the time-locker contract releases the funds to the seller.
5. **Dispute Resolution:** If there is a dispute, ShibassoPay offers a dispute resolution process, involving arbitration to ensure a fair outcome.

ShibassoSwap: Secure swap without rug pull

ShibassoSwap will utilize a middle pool or proxy pool with a time-locker contract between the buyer and the pool to prevent rug pulls. This service will hold significant withdrawals for a set time to prevent rug pulls.

NFT Market: You can own art real and digital

Shibasso will issue a masterpiece collection of NFTs backed by real paintings, establishing a unique market for these NFTs. This platform will allow artists to tokenize their works and engage with the Shibasso community, ensuring authenticity and value.

Roadmap

Stage 1

- **New TG, X, new domain**
- **Changes on Dexscreener**
- **Established multisign community wallet**
 - All donator CW will get paid X% permanently from net income every Shibasso makes in the future.
- **Transforming Shibasso to a DAO**
 - Early council of the DAO established to shift Shibasso from individual to community ownership.
- **Active TG, X, Instagram**
- **Redesigning website**
- **Finalizing full team**

Stage 2

- Update information on Dextools, CoinGecko, etc.
- Create new social channels, including TikTok.
- Start a bigger marketing campaign with a goal of reaching 50 million MC.
- Obtain new CEX listings.

Stage 3

- Issue a masterpiece NFT collection by Shibasso and establish a market for NFTs backed with real paintings.
- Implement ShibassoPay for secure payment between payer and payee, depending on their contract.
- Implement ShibassoSwap as a middle pool or proxy pool with a time-locker contract to prevent rug pulls.
- Finalize the transfer of DAO power from the council to the community.

Stage 4

- Host a grand meeting for Shibasso lovers and holders worldwide.

Tokenomics

- **Total supply:** 8,000,000,000,000
- **Tax:** None
- **LP, Burn**
- **Contract:** Renounced

Income Distribution from Stage 3

- **50%** to the community wallet.
- **30%** reserved for burning Shibasso tokens until half of the supply remains.
- **20%** as gratitude to early donors of the community wallet. Donations in Stage 1 will be counted twice, with gratitude shown to donors from both Stage 1 and Stage 2.

Conclusion

Shibasso's transformation into a mature, vigilant, and community-owned entity marks a new chapter in our journey. With a strong roadmap, the introduction of ShibassoPay, ShibassoSwap, and the NFT market, we aim to build a secure and thriving ecosystem. Join us as we grow and fight for a safer meme world. Together, we are all Shibasso
